The Guthrie Clinic leverages Microsoft Project and the edison365 suite for end-to-end ideation, business case, and project execution.

Helping them deliver on their mission to attain optimal, life-long health and well being.

“We had a pretty good foundation in place for project management and we were looking to take it to the next level. Microsoft Project Online got us there and now, with edison365 ideas, business case, and projects added on, I’m in love!"

- Gail Strausser, Application Manager, The Guthrie Clinic
Innovation in healthcare and in project management

The Guthrie Clinic is dedicated to optimal life-long health and well-being for each person in the community. Guthrie’s long history of innovation has focused on medicine holistically with multi-specialty groups for over 100 years.

About Guthrie Clinic

The Guthrie Clinic is a 107-year-old physician-led 501(c) (3) not-for-profit integrated health system serving NY & PA, with 5,000 employees, 1.2 million outpatient encounters, approximately 300 physicians and 200 advanced practice providers in 25 communities and 4 hospitals.

Challenge

Project intake and initiation was haphazard. Projects were being requested ad-hoc via hallway conversations. There was no standard way to request a project and many great project ideas never surfaced. The circumstances became cumbersome and fell on two people to maintain project status using Excel and homegrown software. A consistent method and system were needed to address these issues.

Guthrie partnered with Innovative-e, a leading MS Gold PPM partner. Sing Innovative-e’s three-step approach; Foundation, Process Enablement, and Success Management, Guthrie realized quick wins and long term benefits.

Key Benefits

- Delivering transparency
- Objectivity on resource workload reporting and project status updates
- Standard tools easy to use & understand
- Projects staffed with appropriate resource levels
